NOW OFFERING

Clevyr Continuous Care

STREAMLINE, SECURE, SUCCEED.

What is Clevyr Continuous Care?

C3: Clevyr Continuous Care is a comprehensive service suite that delivers constant support, expert cybersecurity training, and strategic guidance to ensure your operations run efficiently and stay secure.

CLEVYR

WHO IS C3 FOR?

Resource-Constrained Organizations

Designed for businesses looking to augment internal resources and expertise to effectively manage their technology platforms. C3 ensures these organizations can maintain operational efficiency and concentrate on their primary business goals.

Security-Focused Organizations

Designed for companies prioritizing robust cybersecurity awareness training and advanced analytics. C3 delivers specialized support, cybersecurity awareness training, and proactive monitoring to safeguard operations and empower informed decisions.

Growth-Minded Enterprises

Tailored for businesses seeking scalable and flexible solutions. C3 provides a suite of services that support secure expansion, cloud optimization, and strategic technology upgrades, facilitating sustainable growth and innovation.

THE BENEFITS

Resource-Efficiency Boost

C3 maximizes operational efficiency and minimizes downtime, leading to significant cost savings and increased productivity for resource-constrained organizations.

Strategic Growth Support

By offering scalable solutions and expert guidance, C3 facilitates seamless digital transformation and cloud optimization, empowering businesses to innovate and grow securely.

Security Assurance

Through comprehensive cybersecurity training, proactive monitoring, and incident response, C3 enhances organizations' resilience against digital threats, safeguarding data and maintaining trust.

A LA CARTE OR ALL INCLUSIVE

You've got options.

Now offering a suite of services designed to keep your company's technology secure, seamlessly integrated, and ahead of the curve.

Support and Response

- **Support for your hosted products:** Continuous vigilance ensuring your digital assets are always operational.
- **Guaranteed response times based on Service Level Agreements:** Timely assistance as per the agreed SLA.
- **Regularly scheduled maintenance for updates and patches:** Scheduled maintenance activities to keep your systems updated and secure.

Security and Compliance

- **Vulnerability Scans:** Proactive identification of potential security threats.
- **Cybersecurity Assessment:** Comprehensive evaluations of your cybersecurity posture.
- **Cybersecurity Awareness Training:** Educational sessions to enhance your team's security awareness, and meet the Cybersecurity Training and Awareness requirements of multiple cybersecurity frameworks.
- **Simulated Phishing Attacks:** Realistic phishing simulations to test and improve your organization's preparedness against cyber attacks.

Infrastructure and Monitoring

- **Server architecture and design consultations for optimal performance:** Expert advice on setting up server architectures for high performance.
- **24/7 monitoring:** Constant monitoring to ensure the health and performance of your servers.
- **Support for AWS, Azure, Google Cloud, and other cloud platforms:** Technical assistance for a range of cloud services, ensuring smooth operations across platforms.

Data Management and Business Intelligence

- **Usage, adoption, and governance monitoring for data-driven decision-making:** Insights into how your data solutions are utilized, helping inform strategic decisions.
- **Full range support services for major data management and analytics platforms:** Comprehensive support for Tableau, Alteryx, Matillion, Dataiku, and other leading platforms.

Internal Operations and Portal Management

- **Internal Company Portal:** A self-administered platform that allows for seamless operations within the company.
- **Internal Company Portal administration:** Managed services for your company's internal portal, including additional features and support.

Additional Services and Flexibility

- **Monthly custom packages available:** Tailored packages that cater to the unique needs of your business.
- **Quarterly and biannual assessments:** Regular checks and assessments to maintain and enhance the performance and security of your systems.
- **Flexible hosting options:** custom cloud, shared cloud, or on-premises: Hosting solutions that fit your business's requirements, be it on the cloud or on your on-premises hardware.
